

PVC Tunnel 6000x800x600 mm

1015057

The PVC tunnel is used for firefighting exercises and youth competitions in the obstacle course.

Tunnel 600 cm long, 60 cm wide and 80 cm high, made of soft material - canvas. The construction of the tunnel girder can be of any shape (square, oval or similar), with at least the first girder being raised above the upper side by a minimum of 40 cm and having a flexible connection.

All competitors making up the fire squad on the track must go through the tunnel, and competitor number 1 must go through the tunnel first.
