

## Small Parts Holder Solo Rescue

2005470-6

The Small Parts Holder for the Solo Rescue® Decon Washer enables you to wash and decontaminate even the small parts of your PPE such as disassembled breathing valves and regulators. It is always used together with the Heavy Duty Basket and you can place up to two Small Parts Holders in one heavy duty basket.

Simply disassemble your equipment according to your manufacturer's instructions and place the separate parts in one of the appropriately sized baskets. Put the top cover in place to secure the parts from being able to get thrown out during the wash cycle.
