

Submersible Pump for dirty water Pedrollo Top 2 Vortex GM

1007437

The TOP-VORTEX/GM pump is suitable for use with dirty water and comes complete with a vertical float switch meaning that the pump can be used in particularly small spaces.

As a result of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable. They are suitable for use in applications such as clearing dirty water, emptying tanks, discharging domestic waste water, and for emptying small collection traps containing suspended solids up to a maximum of Ø 20 mm.

Technical specifications

- Liquid type: Dirty water
- Uses: domestic
- Applications: drainage, emptying tanks
- typology: submersible
- Family: submersible pumps

Performance Range:

- Flow rate up to 180 l/min (10,8 m³/h)
- Head up to 8 m

Application Limit:

- Temperature of the liquid to +40 °C
- 3 m maximum immersion depth (with a sufficiently long power cable)
- Passage of suspended solids up to Ø 25 mm
- Suction down to 25 mm above ground level
- Continuous service S1
- Download Datasheet 50 Hz
- Download Datasheet 60 Hz
