

Suction Fire Hose for Competition fi 110 mm

3002290

Fire suction rubber hose with blue PVC rope, for firefighting exercises, competitions and interventions. Suction hoses are used with motor water pump for water suction during flood, or water transfer from water source to fire truck.

The main characteristic of this fire hose is its flexibility. It is designed to allow easy manipulation during the exercise of connecting the suction line, and is elastic enough to return to a flat position.

Technical specifications

- Diameter: Ø 110
- Length: 1600 mm
- Inner layer: smooth SBR
- Reinforcement: synthetic fibers and steel spiral
- Outer layer: smooth SBR, ribbed braided with blue PVC rope (can be delivered without blue braid)
- Couplings: Storz forged couplings
- Maximum pressure: 8 bar
- Maximum vacuum: 0.9 bar
