

Tactical Rechargeable Flashlight TAC-560XL

1006304

This compact rechargeable multi-function metal Xtreme Lumens™ tactical flashlight uses an LED rated at 800 lumens that works in conjunction with a high-efficiency deep parabolic reflector to create a usable beam rated at 205 meters.

The tail-cap switch provides momentary or constant-on functionality, a set of user-selectable high, medium or low-brightness settings as well as a disorienting strobe. The housing and tail-cap are made from aircraft-grade 6061-T6 aluminum and have a Type III hard-anodized finish. Power comes from a rechargeable Lithium-ion battery and includes the ability to run from a pair of CR123 batteries (batteries not included) thanks to the CR123 Battery Carrier (included). (Not compatible with CR123-style rechargeable batteries.)
