

Telescopic Fire Swatter Vft Vallfirest

kat: 201634

The all-new compact fire swatter with an elastic, telescopic handle that extends to 2 meters. A revolutionary concept due to the size and light weight which allows it to be easily carried hanging from the back and in small-size vehicles. It's the ideal Fire Swatter for helitransported squads.

SMALL SIZE

- Ease of transport and greater freedom of movement
- Head with locking and turning system that allows folding the work shovel. Includes cover for transport

LESS PHYSICAL WEAR, GREATER EFFICIENCY

- A telescopic aluminum handle. Extendable to different heights
- Greater impact absorption against the ground
- Prevents impacts on hands and arms
- Increases the power and performance of your work by taking advantage of the inertia of the flexible rod

FOLD-DOWN HEAD

- Folding and locking system at a 45° angle, allowing the blade to adhere to the handle and occupying a minimum space of 92 cm

A CONVENIENT SLEEVE

- A small sleeve for easier and flexible carrying
- Features an adaptable strap for hanging so hands may be free to work with other tools all while carrying the Fire Swatter

IRREGULAR GROUND SOLUTION

- The unique cut design means better adaptation to the irregularities of the ground where you work
- Greater efficiency on the ground
- 25 x 40 cm flap work surface

Technical specifications

- Weight: 1,6 kg
- Rigid handle material: Aluminum

-
- Flexible handle material: Pom C Delrin
 - Blade composition: Tear-resistant cotton multilayer and self-extinguishing synthetic rubber
 - Shovel work surface: 40 x 25 cm
 - Folded length: 92 cm
