

Telescopic Ladder "Telesteps" 75-320

75-320

Telescopic ladders have a variety of uses. They are made of solid and high-quality aluminum, and are extremely light and easy to carry and store, unlike classic ladders. The ability to fold them also makes them extra easy to transport and store. The ladder has a built-in safety lock, which prevents sudden opening and closing.

Compact and lightweight for easy storage and transportation. According to ÖNORM EN 131 standard.

- Compact and lightweight for easy storage and transportation, while also being safe and stable to climb
- Made of high quality anodized aluminum with fibreglass reinforced plastic fittings
- Wide treads for comfortable standing, even over long periods of time
- Simple and safe unlocking
- Rubber anti-slip safety feet are built at a 75° angle for maximum floor grip and stability
- Suitable for a maximum load of 1 person (150 kg)
- According to ÖNORM EN 131 standard

Technical specifications

- Model No: **75-320**
- Rungs: 10
- Length: folded: 0,80 m / extended: 4,20 m
- Width: 0,47 m
- Weight: 11 kg
- Model No: **75-320F** (with jackbeam / stabilizer)
- Rungs: 11
- Length: folded: 0,84 m / extended: 4,50 m
- Width: 0,47 m
- Weight: 12 kg
- Model No: **75-323F** (with jackbeam / stabilizer)
- Rungs: 13
- Length: folded: 0,89 m / extended: 4,10 m
- Width: 0,47 m
- Weight: 15,2 kg
