

Thermal imaging cameras Charge base for Leader TIC 3.1 / 3.3 / 4.1 / 4.3

CHA-TIC

Leader TIC 3 and Leader TIC 4 thermal imaging cameras can all be recharged on the charge cradle. This one can be mounted in a vehicle (12-24V) or mains (110-240V).

It charges the LiFePO4 rechargeable batteries in the camera in a minimum of time without having to take them out. The charge base recharges all the following LEADER thermal imaging cameras: TIC 3.1, TIC 3.3, TIC 4.1 and TIC 4.3.

Technical specifications

- Type: Charging station for LEADER TIC3 and LEADER TIC4 (with or without handle)
- Batteries to charge: LEADER LiFePO4 rechargeable batteries
- Use: Vehicle (12-24V) or mains (110-240V)
- Requires: 12-24V transformer for vehicles or 110-240V transformer for mains connection
- Batteries charged simultaneously: 1 or 2 batteries charged in the camera
- Charging time: 100% in 1:30 h
