

Thermal imaging cameras Mains charger for Leader TIC

CHA-Mains

Mains charger allows LEADER batteries to be recharged directly in Leader TIC 3 and Leader TIC 4 thermal imaging cameras. Simple to connect, it quickly charges the batteries (100% in 2 hours). Green LEDs are activated once the charge is complete.

LiFePO4 batteries are charged as follows: 100% in 2h, 90% in 1h30 and 80% in 1h20. LED's visually inform on the state of full charge or not. Orange: charging, Green: battery charged.

Technical specifications

- Type: 110-240V mains charger for LEADER TIC3 and LEADER TIC4
- Batteries to charge: LEADER LiFePO4 rechargeable batteries
- Use: On mains
- Requires: No additions needed
- Batteries charged simultaneously: 1 or 2 batteries charged in the camera
- Charging time: 100% in 2h, 90% in 1h30 and 80% in 1h20
