

Traffic Handheld Baton, LED Flashing lights

3005176

Made of high quality white polyamide plastic, very resistant to breakage (elastic).

Resistant to aging as well as discoloration, resistant to atmospheric influences and bacteria and therefore does not support the development of fungi in contact with human skin. Total length of stop baton 450 mm. Total weight 410 grams. Handle length 250 mm, diameter 35 mm, with longitudinal grooves for better grip and a strap on the lower part of the handle for possible carrying around the wrist. It is also the holder for battery cartridges R 14 (3 pieces) and has a switch for turning the lights on and off.

- A 3.5V 200 mA bulb in the E10 socket or a new electric circuit with 12 pieces of third-generation SMD LEDs that have lower energy consumption and thus extend battery life by about five times with a far more noticeable light beam.
- On one side of the baton is a red LED light, which allows high visibility in the dark. Around the light in the middle of the baton, there is a sticker made of self-adhesive EG reflective foil in red color with a guaranteed durability of 7 years. Inside that sticker, the inscription STOP / FIREFIGHTERS is printed in black letters.
- On the other side of the baton is a green LED light, which allows high visibility in the dark. Around the light located in the middle of the baton, a sticker made of self-adhesive EG reflective foil in green color with a guaranteed durability of 7 years is placed.

Technical specifications

- Double sided lighting (red / green)
- Resistant to external conditions
- LED bulbs III. generation
- Length: 450 mm
- Handrail: 250 mm
- Weight: 400 g
