

Transformer Piercing Nozzle

100103

The Task Force Tips Transformer PA1 Piercing Nozzle System is designed to deliver water or foam solutions to areas inaccessible to the fire fighter.

A series of jets near the point apply a wide reaching pattern at a rated flow of 570 l/min at 7 bar (150 gpm at 100 psi). The PA1 system includes a unique twist-grip shutoff valve, a 3 port junction block with striking head, 2 extension tubes, and the flow tube with piercing point. The easy to use and rugged, twist-grip shutoff valve, regulates nozzle flow without the need for an additional shutoff valve. The 3 port junction block and striking head allow the nozzle to be configured to short, medium, long and L shaped combinations, making it easily adaptable to specific fireground situations.

The PA1 system features a hardened steel piercing point, all extension tubes and valve are constructed of hard coated extruded aluminum, and a sturdy nylon carrying bag with compartments for each component is included.

Technical specifications

- Pistol Grip: No
- Inlet Coupling Style: 52 mm Storz
- Body Size: 2" (52mm)
- Inlet Coupling Swivel: Full Time Swivel
- Type: Specialty
- Remote Control: No
- Weight: 14.35 kg
