

## TURBO Nozzle 2"

1033099

Turbo nozzles have the option of full and spray jet. The type of jet is adjusted using a rotating head. A valve ball built into the mechanism allows quick start and switching of the jet type.

### Construction material:

- Cast in AK 11 aluminum alloy (AlSi 11), rubber seal, rotary head - plastic.

### Technical specifications

Size (mm)	Work pressure (bar)	Flow capacity at 2 bar, full jet (l/min.)	Flow capacity at 6 bar, full jet (l/min.)	Jet range at pressure 0,2 bar	
				Centered jet	Sprayed jet
25	2-12	100:150	170:280	10 m	3 m
