

## Underground Hydrant DN 100

1004135

An Undergorund Hydrant DN 100 is installed in underground pipeline and is used for water delivery to the ground.

Underground fire hydrants are designed for water intake at 50 °C and 16 bar pressure from underground pipelines for fire fighting purposes. The hydrant is opened and closed by the "T" key for the hydrant applied on the lid. Hydrant attachments (B/2B, B/2C ...) are used to supply water from the underground hydrant through delivery fire hose.

### Purpose:

- Water
- Drinking water

### Technical specifications

Nominal diameter	Nominal pressure	Test pressure		Approved working pressure
		Kučište	Zatvoreno	
100 mm	10 bar	16 bar	10 bar	10 bar
100 mm	16 bar	25 bar	16 bar	16 bar
