

## Vehicle Stabilization Strut / V-Strut

100203

### Lightweight tool for instant, safe stabilization:

- Vehicle stabilization strut with integrated head, base plate and tensioning belt with hook and ratchet mechanism
- All-in-one solution, no loose parts that may get lost

### Unique auto-lock system:

- Pulls out and locks automatically in one movement
- No separate operation required to lock the strut
- Locking holes over the full strut length at very small intervals
- Enables fine length adjustment

### Squeeze and push mechanism:

- To release the strut quickly and easily after use

### Extremely lightweight:

- Easy to carry
- Easy to work with

### Serrated, multi-purpose head:

- For optimal grip
- Suitable for use with all types of vehicles

### Tensioning belt:

- Tensioning belt with hook and ratchet mechanism
- For quick and easy attachment to the car
- Enables the rapid creation of a stable triangle

### Snap hook:

- For fast and easy detachment and reattachment

### Reel for tensioning belt:

- Prevents tangling of tensioning belt
- For compact storage

Technical specifications

Details		
Articlenumber	150.062.158	
Basic specifications		
model	V-Strut	
Performance		
max. axial load		3597 lbf
min. effective length	1080 mm	42.5 in
max. effective length	1800 mm	70.9 in
Dimensions, weight and temperature		
weight, ready for use	7.9 kg	17.4 lb
