

Water-driven fan MH260 - 79,900 m³/h

MH260

Powered by a water-driven engine with a control valve and a pressure gauge, MH260 water-driven fan is easy to use.

Created to generate no exhaust gas and requiring no electrical power, it can be used anywhere provided it has a properly sized water supply. Equipped with a standard misting system, this water-driven fan can cool the air quickly. Compact, it fits easily in a vehicle.

Product Features

Water-driven

Powered by a water-driven engine, MH260 does not generate any exhaust gas and requires no power supply.

Powerful

Powerful, MH260 water-driven fan generates an open air flow of 79,900 m³/h.

Integrated misting system

MH260 water-driven fan is equipped with a standard misting system for faster and more efficient air cooling.

EASY POW'AIR technology

EASY POW'AIR technology reinforces the air entrainment effect, specific to turbo-blowers, thus allowing to place the fan at a greater distance from the opening (from 2 to 6m) in order to create valuable space for response teams.

Technical specifications

- Open air flow: 79,900 m³/h
- Weight: 49 kg
- Dimensions W x H x D: 710 x 720 x 617 mm
- Propeller diameter: 570 mm
- Engine: Water-driven motor in aluminium with cutoff and control valve. With pressure gauge
- Engine power: 9 HP
- Power supply: Water under pressure
- Consumption: 620 l/min @ 10 bar
- Engine supply couplings: Inlet / Outlet: 2" male
- Noise level: 92.8 dB at 3m
- Ventilation type: PPV blowing
- Application: Single door (houses, small buildings, etc.) and double door (very tall buildings, medium-size industrial units, etc.)
- Integrated mister: Yes
