

Wooden Timber 2000 mm

1015090

The Firefighter Youth Competition The “Obstacle Exercise” consists of several devices that young firefighters need to go through as quickly as possible and with as few mistakes as possible. Part of these devices is a wooden timber 200 cm long, 20 cm wide and 35 cm high.

How to successfully cross the timber:

- The timber must be mastered along its entire length.
- You must stand on the timber with at least one foot.
- The length of the timber must not touch the ground.
- The competitor with number 1 must step on the timber and run over it first.

Technical specifications
